**B. An Architect in responsible control must be competent to translate a design concept into built form and be able to:**

- Investigate and interpret design objectives and relevant issues and prepare the brief for a design project;
- Advise on project evaluations, feasibility studies and programs;
- Evaluate and determine structural, construction, and engineering elements of a building and integrate the advice and design of specialist disciplines into a building project;
- Assess the physical influences on buildings and the technologies associated with providing internal conditions of comfort and protection against the climate, and coordinate and integrate services systems to control them;
- Meet building users' requirements within the constraints imposed by cost factors and building regulations;
- Provide advice on issues of construction, procurement and contract administration;
- Generate the documentation and information needed to translate a design concept into a building;
- Manage the procurement of buildings, administer contractual arrangements and monitor their construction.
